Is your budget sufficient for student workers? If not, provide a plan of action that indicates the needs of your department, estimated costs and benefits.

We actually struggled to be able to pay the student workers this academic year due to the large number of students willing to work for the department. We have to maintain a balance between helping students and instructors at the same time to preserve the quality of our program. We also need to increase the number of Research Assistants to publish papers, implement software projects, and assist in the department's research efforts.
