

Instructional Goal				Assessment		Notes
Instructional Goal To provide a graduate level public health education built on public health competencies for students and health professionals within a framework of social justice, health equity and determinants of health. Rationale:						* What do the data tell you? How will you use this data? How were data from the last cycle used to make changes during this cycle, and What were the results of those changes?

Instructional Goal To provide a graduate level public health education built on public health competencies for students and health professionals within a framework of social justice, health equity and determinants of health. Rationale:

* What do the data tell you? How will you use this data? How were data from the last cycle used to make changes during this cycle, and What were the results of those changes?

			<p>instruments, etc) to help refine your question and population.</p> <p>reference list and literature review to your more specific parameters.</p> <p>Refining the Research Question (20 points)</p> <p>In Capstone one you should have gotten a topic for your research and begun searching for articles.</p> <p>In Capstone two we need to refine the topic.</p> <p>How do your refine your topic: Examine the literature you have found most closely related to your research topic, look at the way they address the topic.</p> <p>similar with a</p>
